# BELL Warranties

Our Warranty offer is genuine and transparent, whilst also being long-lasting and protecting the interests of our customers. We are confident in our products thanks to our extensive testing and strong supplier relationships.

When you choose BELL Lighting, you choose products which have been developed with longevity in mind, which allows us to protect them with industry leading Warranties. This long-term approach is thanks to our status as a family business with a rich British heritage and over 100 years of innovation. We are not afraid to release products into the market which are ahead of their time, because we will be around and thriving in many years to come.

## Gold Product Warranties

Our Gold Product Warranty reflects the extreme belief which we have in our product range. Our Gold Product Warranty package protects our professional range of products with up to 10 years of support from BELL Lighting. The protection which we offer our customers is substantial and transparent; we are a company which has a strong desire to build long-term business relationships, and as a result we want to support our customers and work in partnership with them.

## Silver Product Warranties

Our Silver Product Warranty offers peace of mind, protecting our customers in the unlikely event of product failure. Our Silver Product Warranty package covers selected product ranges for up to 5 years and is in place alongside our exceptional testing facilities to provide our customers with full confidence when choosing BELL Lighting.

## 1/2 Year On Site Warranty

Our 1/2 Year On Site Warranty offers supporters of BELL Lighting complete peace of mind. We believe that our On Site Warranty should be championed, and our introduction of this form of protection represents the genuine and unwavering confidence which we have in our product development, testing facilities, and customer service. One of our core values as a business is 'Customer Experience' and our Warranty offer exemplifies this central pillar of our company.

<sup>1</sup> Exceeds EU standard of 70 for Lumens Maintenance Ratio

<sup>2</sup> Exceeds EU standard of RA 70 for Colour Rendering Index

<sup>3</sup> Subject to terms & conditions (Contact Customer Service)

Emergency versions must be tested in line with the requirements of BS5266, failure to do so may effect battery life and warranty.

LMR80: Maximum 20% of lumen depreciation over rated hours. B10: Maximum 10% of fittings failure rate over rated hours

## Customer Rewards Scheme

As a thank you, we have launched our brand new BELL Advance Customer Rewards Scheme. Our aim is to reward loyalty, the more you spend, the more we give back to you, the contractor.

- 1 Register** at [www.belladvance.co.uk](http://www.belladvance.co.uk) and receive your complimentary reward points along with automatic entry to our monthly prize draw.
- 2 Buy** BELL Lighting Products & collect points, take a photo of your invoice and upload.
- 3 Redeem** once you have accumulated your well-earned points, simply redeem your rewards in the form of retail vouchers, emailed direct to your inbox.

## Lighting Design, a dedicated team of specialist engineers ready to help

Our team of professional lighting designers and engineers have over 50 years of experience in the lighting industry. We know the importance of good lighting design and the benefits a lighting engineer will bring to a project. Our lighting design service ensures correct light levels are achieved in compliance with current regulations.

Our specialised knowledge of lighting and lighting control systems provides a smooth hassle free process, delivering beautiful energy saving lighting solutions on time and on budget.

Working within the UK and internationally, the lighting team have established a reputation for designing a broad range of exciting projects of all sizes, from single rooms through to partnerships with multi-disciplined design teams on large infrastructure projects.

We are a responsive and fast moving team who can manage the complete lighting design process from concept through to the tender & supply

For all internal, external & emergency projects contact:

## Skyline Powertron Asymmetric LED Floodlight

- Ideal for external sports lighting facilities
- Black powder coated die cast robust aluminium construction
- 600/1200/1800W Modular Body Design
- Genuine replacement for 1000W/2000W Metal Halide Floodlights
- Fully adjustable angled mounting bracket
- Suitable for multiple row column installations
- Scope available on request for fine on site aiming
- Full cut-off horizontal asymmetric floodlight
- Optional ULR Shields available for 0% upward light, glare and obstructive light reduction
- Remote driver gear tray, can be mounted on ground level for easy maintenance
- Marine Grade as standard
- 1200 & 1800W suitable for 415V dual phase installation, 600W available on request
- CASAMBI & DALI options available

## Aldershot Garrison

Aldershot Garrison is often referred to as the "Home of the British Army", a title which showcases the importance of the site. Aldershot Garrison is now home to the headquarters of the Army's Regional Command and Home Command, as well as the Army Special Operations Brigade.

The Rugby Stadium at Aldershot Garrison dates back to the 19th century, with the arena being one of the key assets at the site. The area hosts weekly play at various levels, attracting spectators, friends and family members of those serving at Aldershot Garrison, and even visitors who cover playing activity to provide televised coverage of matches for the army channel.

“

The control of spillage is really good with the product - it's one of the best on the market and there won't be many fittings which could outdo what the product has done on that pitch.

I'm pleased to use it and I will use it a lot more in the future. If there are ever any issues, we know that BELL Lighting are just a phone call away and things are always put right quickly with the support from the team.

Working with BELL, we make a great team.

”

**Kim Sports Lighting**

## England Rugby

Fully compliant to approved lighting levels standards

## skylinepowertron

- Ideal for external sports lighting facilities
- Black powder coated die cast robust aluminium construction
- 600/1200/1800W Modular Body Design

### Case Study: Aldershot Garrison, BELL Powertron

Over the life of the fitting, Aldershot Garrison could save: £63,000 in energy costs, energy saving 45%

- Annual Energy Saving 18,000 kWh
- Annual CO<sub>2</sub> Saving 4,500 kg

Four Skyline Padel lights are sufficient to cover one padel court, saving on both lighting fixtures and installation costs.

With advanced asymmetrical intense 40.5° optics, the lighting fixture can be horizontally installed without any complex adjustment.

Padel court are a standard size, which means that you can easily produce lighting calculation, and simply adjust the fitting to the right angle when mounting.

## Boston Spa Tennis Club:

Boston Spa Tennis Club has over 200 members, providing both social and competitive team tennis opportunities to the local community. The club has Men's, Women's, Mixed and Junior teams in the Leeds, York, Barkston Ash and Harrogate leagues.

Boasting four all weather courts, allowing for play throughout the year, with three of the courts now covered through our LED Lighting solution.

The club has recently partnered with Angela Crossley Tennis Coaching (ACTC), an organisation which provides coaching in the local area.

“

The previous fittings which were installed caused issues due to moving when winds were high, this meant that playing conditions were poor at times and there was a lot of glare for our players. The new BELL Lighting products have solved this issue and we are delighted with the energy savings involved and the long lifetime of their Skyline Virtus LED Floodlights.

BELL Lighting were helpful throughout the process and we appreciate all of their help.

”

**Peter**  
**Boston Spa Tennis Club President**

## Lawn Tennis Association

Fully compliant to approved lighting levels standards

## Skylinevirtus

- Genuine replacement for 250/500/750W Metal Halide/Sodium Floodlights
- Wattage Switchable
- Asymmetric distribution, low light pollution (Asymmetric version)

### Case Study: Boston Spa Tennis Club: BELL Skyline Virtus

Over the life of the fitting, Boston Spa Tennis Club could save: £69,300 in energy costs, energy saving 60%

- Annual Energy Saving 4368 kWh
- Annual CO<sub>2</sub> Saving 2446 Kg

## LED Floodlight

- 10/20/30/50W Genuine replacement for Halogen Floodlights
- 70/100/150/200W Genuine replacement for Metal Halide Floodlights
- Marine Grade Aluminium body
- Fully encapsulated IP65 TUV certified driver
- PIR Over-ride function
- Average 8M detection range for PIR Floods
- Separately tested IP65 PIR

Technical Specification	
Construction	Die Cast LM6 Marine Grade Aluminium body, Stainless Steel screws and fixings
Driver	BELL
LED Chip	Phillips
Input Voltage	240V
Power Factor	> 0.9
Operating Temp	-20°C - +25°C (Outdoor use only)
Standard	CE & UKCA

### Technical Specification

Construction	Die Cast Aluminium Body, Polycarbonate Lens
Driver	Muso 1-10V Dimmable as standard
LED Chip	Seoul Semiconductor
Input Voltage	220-240V
Power Factor	> 0.9
Operating Temp	-30°C to +50°C / Emergency version min temp -5°C
Standard	CE & UKCA

Optional infra-red remote control available for PIR & microwave sensor versions.

Quick and easy adjustment for multiple fittings; dimming level, presence detection, light levels & automatic on-off time. Average 15M range.

### 7 Year Gold Warranty

Technical Specification	
Construction	Aluminium
Driver	Sosen
LED Chip	Seoul
Input Voltage	110-264V
Power Factor	> 0.9
Operating Temp	-30°C to +45°C / Emergency version min temp -5°C
Standard	CE & UKCA

Optional infra-red remote control available for microwave sensor versions.

Quick and easy adjustment for multiple fittings; dimming level, presence detection, light levels & automatic on-off time. Average 15M range

### 3 Step Dimming Function

With sufficient natural light, the fitting does not switch on when presence is detected.

With insufficient natural light, the sensor switches on automatically when presence is detected.

After the hold-time, the sensor dims the fitting to the pre-set low light level if no motion is detected.

Fitting switches off after the stand-by period has elapsed if no motion is detected.

### 7 Year Gold Warranty

With sufficient natural light, the fitting does not switch on when presence is detected.

With insufficient natural light, the sensor switches on automatically when someone enters the room.

When the room is empty, light dims to stand-by level (10% / 20% / 30%) after the hold-time.

Light switched off automatically after the stand-by period has elapsed.

**Tri-Level Control (Corridor Function)**

Optional infra-red remote control available for microwave sensor versions.

Quick and easy adjustment for multiple fittings; dimming level, presence detection, light levels & automatic on-off time. Average 4M range

Offers 3 levels of light: 100%-dimmed light (10%, 20%, 30%)-off; and 2 periods of selectable waiting time: motion hold-time and stand-by period; selectable daylight threshold and choice of detection area.

**Dura**

- The Dura LED Anti Corrosive Batten is one of BELL's flagship Luminaires
- Fully enclosed luminaire comes with stainless steel diffuser clips
- Ideal for exterior lighting projects that are open to the elements

### **Northern Ireland Water: BELL Dura LED Integrated Anti Corrosive Battens**

Over the life of the fitting, Northern Ireland Water could save: £86,384 in energy costs, energy saving 46%

- Annual Energy Saving 54,787kWh
- Annual CO<sub>2</sub> Saving 25,750kg

## LED Integrated CCT Anti Corrosive Batten

- Combines the reliability of the Dura Batten with the added CCT & wattage switchable functionality
- 3000/4000/600K Colour Switchable
- 4 Wattage Switchable
- Plug in emergency packs, Microwave and PIR on/off sensors create a very stock friendly solution for wholesalers and contractors alike
- The ideal replacement for Single/Twin Fluorescent T8 and T5 Fixtures
- Perfect for all commercial environments
- Tool-free termination
- Suitable for BESA Box mounting
- Improved lens clips for quick and easy access
- Repositionable terminal blocks
- Multiple entry points

### **Vauxhall Assembly Plant, Luton: BELL Ultra LED Integrated Battens**

Over the life of the fittings, Vauxhall Assembly Plant could save £2,159,231 in energy & maintenance costs, energy saving 64%

- Annual Energy Saving 1,228,500kWh
- Annual CO<sub>2</sub> Saving 687,960kg

## LED CCT Wattage Switchable Integrated Batten

- Combines the reliability of the Ultra Batten with the added CCT & wattage switchable functionality
- 3/4/6000K Colour Switchable
- 4 Wattage Switchable
- Versatile general-purpose batten
- Plug in emergency packs, Microwave and PIR on/off sensors create a very stock friendly solution for wholesalers and contractors alike
- The ideal replacement for Single/Twin Fluorescent T8 and T5 Fixtures
- Special high light transmission frosted polycarbonate diffuser
- Tool-free termination
- Shatterproof

Power Factor	> 0.9
Operating Temp	-20°C to +40°C
Standard	CE & UKCA

With sufficient natural light, the fitting does not switch on when presence is detected.

With insufficient natural light, the sensor switches on automatically when someone enters the room.

When the room is empty, light dims to stand-by level (10% / 20% / 30%) after the hold-time.

Light switched off automatically after the stand-by period has elapsed.

### Technical Specification

Construction	Polycarbonate body and lens
Driver	BELL
LED Chip	Samsung
Input Voltage	220 - 240V
Power Factor	> 0.9
Operating Temp	-20°C to +40°C
Standard	CE & UKCA

With sufficient natural light, the fitting does not switch on when presence is detected.

With insufficient natural light, the sensor switches on automatically when someone enters the room.

When the room is empty, light dims to stand-by level (10% / 20% / 30%) after the hold-time.

Light switched off automatically after the stand-by period has elapsed.

### 3 Year Silver Warranty

11368	-	Satin Spacer Plate for Primo/Duo/Geo	-	-	-

The housing has been designed to remain in the ceiling for life removing any need for recycling or possibility for landfill disposal.

The Geo-Mod® (sold separately) has been designed so at the end of life it can be returned to the manufacturer to be re-used and re-manufactured saving the need to recycle 90% of the product.

# FirestayLED

CCT 4 way selectable colour switch

## Firestay LED Anti-Glare CCT Fixed & Centre Tilt Downlight

- Designed specifically for areas where low glare is required
- Perfect for high end domestic and hospitality installations

# A+ Energy Rated LED Lamps - The Next Step in Efficiency

At BELL Lighting, we're proud to offer a premium selection of A+ Energy Rated LED Lamps, delivering best-in-class performance for energy-conscious customers. This advanced range includes: GLS/GU10/Squirrel Cage lamps.

## Why Choose BELL A+ LED Lamps?

- 41% lower energy consumption vs Class F LEDs
- 50,000 hour lifespan = fewer replacements
- Lower environmental impact
- Smart. Efficient. Long-Lasting. Switch to BELL A+ LED Lamps today

## How Much Can You Save by Switching to A+ LED Lamps?

### Savings for the Average UK Household

- The typical household uses around 30–40 lamps
- A Class F LED consumes 3.4 watts, while a BELL A+ LED provides the same brightness at just 2 watts a 41% energy reduction per lamp
- At 3 hours per day, switching to A+ LEDs can save: 60–80 kWh annually
- Around £20–£28 per year, based on an average electricity rate of £0.35/kWh

### Savings for a Medium-Sized Hotel

- A hotel may operate 1,000+ lamps, often for 10–16 hours a day, depending on area usage.
- By replacing 1,000 Class F (3.4W) LEDs with 2W A+ LEDs, annual savings could reach: over 5,000 kWh per year
- Equivalent to £1,750+ in annual electricity savings
- Plus significantly reduced maintenance costs with 50,000-hour lamp life
- Environmental & Operational Benefits
- Lower CO<sub>2</sub> emissions from reduced energy usage
- Fewer replacements due to extended lifespan
- Reduced disruption in high-traffic areas like lobbies, hallways, and guest rooms

BELL Lighting's A+ LED range combines 'best in class' efficiency with beautiful, long-lasting light - making it the ideal upgrade for homes and businesses focused on performance, sustainability, and cost savings.

## Platinum Class A LED Glass GU10

- Save up to 96% energy when compared to halogen lamps
- Over 3X longer life than most other conventional LED GU10's
- True fit GU10 size
- One of the most energy efficient LED GU10 lamp on the market
- Suitable for Fire Rated and IP rated fixtures

### 5 Year Silver Warranty

## Pro Precision GU10 Range - Focused Performance, Exceptional Clarity

The BELL Pro Precision LED GU10 range is engineered for environments where clarity, colour, and control matter most. With a choice of 10° or 20° beam angles, these lamps deliver clean, crisp directional lighting — ideal for retail displays, museums, galleries, and other high-precision settings.

### Key Features & Benefits

- 6W High-Performance Output
- Offers powerful, focused illumination for highlighting products or focal points
- Ultra-High Colour Rendering - CRI 95
- Ensures vibrant, true-to-life colour representation, making displays pop and preserving the integrity of artwork or merchandise.
- Precision Beam Angles
- Available in 10° and 20°, for tight spot or narrow flood effects - perfect for accent and display lighting
- True Fit GU10 Size
- Designed for seamless installation in standard GU10 fittings, including fire-rated and IP-rated fixtures
- Advanced Dimming Compatibility
- Fitted with a high-grade driver for smooth, flicker-free dimming at both low and high load levels. Compatible with most rotary and digital dimming systems
- Available in Cool White & Warm White
- Choose the perfect tone to suit your space and application

Whether you're lighting high-end retail, enhancing visual art, or elevating architectural features, the BELL Pro Precision GU10 delivers professional grade results every time.

## LED Pro Precision GU10

- The 6W Pro Precision LED GU10 provides clean, crisp, directional lighting, ideal for the retail environment to highlight products
- With a high (95) Colour Rendering Index (CRI) which ensures brightly coloured products are displayed to their full potential
- True fit GU10 size
- Colour Rendering Index 95
- Suitable for fire rated and IP rated fixtures
- High grade driver designed for smooth dimming at min & max load levels, operating effectively with rotary and digital dimming systems
- Cool White/Warm White
- Suitable for museums and galleries

### Country House Hotel: BELL 3.3W Vintage Lamps

Over the life of the lamps, the hotel could save: £1,944 in energy costs, Energy Saving 90%

- Annual Energy Saving 4,717kWh
- Annual CO2 Saving 2,642kg
- Annual Maintenance Saving £300

## Aztex LED Filament Lamps - Where Style Meets Substance

The Aztex Range from BELL Lighting blends high-performance lighting with striking decorative design, creating the perfect fusion of function and visual appeal.

Each lamp in the Aztex collection features a CRI90 rating as standard, ensuring excellent colour accuracy and clarity — a step above conventional LED filament lamps. But what truly sets Aztex apart is its distinctive filament design, adding character and ambience to any space.

### Elegant Design. Superior Light Quality.

- CRI90 Colour Accuracy
- Brings out true, vibrant tones in interiors, materials, and furnishings — ideal for both hospitality and residential settings
- Decorative Filament Designs
- Unique filament shapes enhance the visual appeal of each lamp, even when switched off making them a design feature in their own right
- Wide Variety of Shapes & Styles
- From classic globes to modern teardrops and vintage-inspired squirrel cages, the Aztex range offers options for every décor
- LED Efficiency Meets Vintage Aesthetics
- All the charm of traditional filament lamps, with the energy savings and long life of advanced LED technology

Whether you're lighting a boutique hotel, a high end restaurant, or a beautifully styled home, Aztex LED Lamps offer the perfect balance of atmosphere, performance, and design versatility.

## Aztex High CRI LED Soft Coil Pear Drop/Large Globe

# LED Compact Fluorescent Alternatives

Upgrade to LED

# LED Alternatives for Compact Fluorescent Lamps - One of the UK's Widest Ranges

At BELL Lighting, we understand the need for reliable, energy-efficient solutions when upgrading legacy CFL installations. That's why we offer one of the most comprehensive ranges of LED CFL replacements in the UK - designed to suit virtually every application, from domestic dwellings to demanding commercial environments.

Whether you're retrofitting office lighting, upgrading retail spaces, or modernising communal areas in residential buildings, our extensive LED range ensures you'll find a perfect-fit replacement.

## Our CFL Replacement LED Range Includes:

- LED Tubes
- High lumen output for commercial-grade performance
- CCT selectable options for on-site flexibility
- Class A energy-rated tubes for maximum efficiency
- LED 2D Lamps
- Over 15 variants available, including multiple wattages, colour temperatures, and pin configurations ensuring full compatibility with legacy 2D fittings
- PLL Replacements
- Efficient, long-life solutions for applications in corridors, washrooms, and large-format ceiling fixtures
- PLD, PLT & PLS Replacements

Compact alternatives for a wide range of traditional CFL base types, with improved lumen maintenance and reduced running costs

## Why Choose CFL LED Alternatives from BELL?

- Direct-fit and retrofit options available
- Energy-efficient upgrades with reduced CO<sub>2</sub> output
- Suitable for commercial, residential & public sector use
- Longer lifespans reduce maintenance and replacement cycles
- Trusted British quality from a family business with more than 100 years of lighting innovation

From multi-site facilities to single-property upgrades, BELL Lighting has the LED solution to meet every CFL replacement need - with no compromise on quality, compatibility, or performance.

## LED Square 2/4 Pin

- Replacement for 16W & 28W CFL Square lamps
- Same aesthetic as CFL Square lamp but reduced energy consumption
- Retrofit
- 15000 Hours
- Perfect for commercial & domestic applications
- Quick, easy installation

### 3 Year Silver Warranty

# LED Tubular & Elliptical Lamps – The Modern Alternative for HID Lighting

BELL Lighting's range of LED Tubular and Elliptical lamps offers a high-performance, energy-efficient alternative to outdated Metal Halide (MH) and Sodium (SON) technologies. These lamps are designed to provide a direct retrofit solution, delivering powerful light output with dramatically reduced energy consumption and maintenance needs.

Whether used in street lighting, industrial spaces, floodlights, or high-bay fittings, our LED HID replacements offer all the brightness you expect - with none of the inefficiency.

## Benefits of BELL's LED Tubular & Elliptical Lamps

- Direct Retrofit for Metal Halide & Sodium Lamps
- Easy to install in existing luminaires, without needing to redesign the lighting system.
- High Lumen Output
- Maintains the performance required for large, open spaces - ideal for commercial, industrial, and external lighting.
- Energy Savings Up to 65%
- Significant reduction in running costs compared to traditional discharge lamps.
- Longer Lifespan - Up to 50,000 Hours
- Fewer lamp changes, less disruption, and lower maintenance costs.
- Instant Start with No Warm-Up Time
- Full brightness immediately - safer, more efficient, and better suited for motion sensor applications.
- Improved Colour Rendering
- Cleaner, more natural light improves visibility and safety, especially in exterior or industrial environments

Make the switch to BELL LED Tubular and Elliptical lamps - and bring legacy HID lighting into a new era of efficiency, reliability, and performance.

## LED HID Alternative

# Halogen Class 'C' Energy Saving 78/117mm R7's Linear

- Ideal for both domestic and commercial applications
- 2000 Hours
- Dimmable
- Retro-Fit
- Warm white

Code	Lamp Type	Temp	Lm
Dimmable			
03841	80W 240V 78mm Halogen Linear - R7 Dimmable	2700K	1400
03842	120W 240V 78mm Halogen Linear - R7 Dimmable	2700K	2250
03847	80W 240V 117mm Halogen Linear - R7 Dimmable	2700K	1400
03843	120W 240V 117mm Halogen Linear - R7 Dimmable	2700K	2250
03844	160W 240V 117mm Halogen Linear - R7 Dimmable	2700K	3150
03845	240W 240V 117mm Halogen Linear - R7 Dimmable	2700K	4900
03846	400W 240V 117mm Halogen Linear - R7 Dimmable	2700K	8700

Operating Hours  
**2,000**

## Incandescent Appliance Lamps

- Our appliance lamps cover a wide range of applications for all domestic appliances
- Traditional Lamps
- Dimmable
- Warm white
- 1000 Hours

Code	Lamp Type	Temp	Lm
Dimmable			
02400	15W Appliance Microwave/Fridge Lamp, Dimmable SBC Clear	2700K	80
02410	15W Appliance Microwave/Fridge Lamp, Dimmable SES Clear	2700K	80
02420	40W Cooker Hood Lamp Dimmable SBC Clear	2700K	360
02430	40W Cooker Hood Lamp Dimmable SES Clear	2700K	360
02431	15W Oven Lamp 300 Degree Dimmable SES Clear	2700K	85
02432	25W Oven Lamp 300 Degree Dimmable SES Clear	2700K	190
02433	40W Oven Lamp 300 Degree Dimmable SES Clear	2700K	360

# Incandescent Pygmy/Small Sign & Night Light

- Traditional Lamps
- Dimmable
- Available in a variety of wattages and cap types
- Warm White
- 1000 Hours

Code	Lamp Type	Temp	Lm
Dimmable			
02530	15W Small Sign (Pygmy) Dimmable - BC Clear	2700K	90
02610	15W Small Sign (Pygmy) Dimmable - SES Clear	2700K	90
02630	25W Small Sign (Pygmy) Dimmable - BC Clear	2700K	170
02640	25W Small Sign (Pygmy) Dimmable - SBC Clear	2700K	170
02650	25W Small Sign (Pygmy) Dimmable - SES Clear	2700K	170
02393	7W Nightlight Dimmable - CES Clear	2700K	34
02392	7W Nightlight Dimmable - SES Clear	2700K	34

Operating Hours  
**1,000**

## IP Ratings

Classification of the degree of protection a luminaire provides against the entry of solid foreign bodies and moisture. IP65 rated units are protected against dust and offer protection against water jets.

### Recommended Light Levels - CIBSE Guidelines

Public areas with dark surroundings 10-50 Lux

Car parks 10-50 Lux

Warehouse racking 150 Lux

Brighter areas such as bathrooms 150-200 Lux

Warehouses, homes & theatres 150-200 Lux

Simple office work and classrooms 300-500 Lux

Normal office work with computers 300-500 Lux

Supermarkets and workshops 500-1000 Lux

### Typical Lighting requirements for commercial applications

#### Meeting & boardroom

The main lighting should be focused on the table areas. Allowing control of lighting near screens and displays. Use feature lighting to provide depth and impact.

#### Office area

Allow for flexible use of the space so that desks can be repositioned. Consider using occupancy detection and natural daylight, this will require lighting control. Light emergency escape routes.

#### Reception

The reception area provides the first impression of a business. The main and accent lighting should be varied to provide an interesting environment.

#### Stairwells

Focus on safety ensuring good light levels. Also ensure the emergency requirements for escape are met.

#### Showroom

Focus should be on the products being displayed. Good CRI is important to ensure that colours are displayed correctly, BELL LED lamps have good and consistent CRI. Also consider the reliability of the lighting, a long lamp life is important or the products will become dimly lit over time as lamp performance deteriorates.

#### Exterior

Think about the security requirements and the safe passage of staff and visitors when entering and leaving a building. Good exterior lighting can dramatically improve the look of a building so consider both lighting the area around the building and the elevations of the entrance area and side walls. The correct choice of fittings and colour temperature is important.

#### Making the most of your lighting

Good lighting design recognises the need for depth of view. Both ambient and accent lighting should be used, whilst combining colour temperatures to create a more comfortable working environment.

Ambient lighting is the general lighting within an area and typically contributes 80% of the overall lighting level.

Accent lighting adds interest and depth to a design and should compliment but not conflict with the ambient lighting. This can include wall washing, the subtle use of colour, up lighting and spotlighting.

Ingress	Description	Protection	Short Description
0	Not Protected	0	Not Protected
1	Protection against solid objects greater than 50mm	1	Protected against dripping water
2	Protected against solid objects greater than 12mm	2	Protected against dripping water when tilted up to 15°
3	Protected against solid objects greater than 2.5mm	3	Protected against spraying water
4	Protected against solid objects greater than 2.5mm	4	Protected against splashing water
5	Protected against solid objects greater than 1mm	5	Protected against water jets
6	Dust protected	6	Protected against heavy seas
7	Dust Tight	7	Protected against the effects of immersion
		8	Protected against submersion

## What is CRI and Why It Matters

CRI (Colour Rendering Index) is a measure of how accurately a light source displays colours in comparison to natural light. Rated on a scale from 0 to 100, the higher the CRI, the more faithful colours appear under the light.

In practical terms, a lamp with a high CRI (90+) ensures that colours look vivid, natural, and true to life — whether you're lighting a home, retail space, hospitality setting, or workplace. Lower CRI lamps (typically in the 70–80 range) may cause colours to appear dull, washed out, or inaccurate.

### Benefits of High CRI LED Lamps

- **Enhanced Colour Accuracy:** Ideal for environments where visual detail and colour distinction are important, such as fashion, food retail, galleries, or healthcare
- **Better Visual Comfort:** High CRI lighting reduces eye strain and improves the overall visual experience
- **True-to-Life Presentation:** Accurately represents skin tones, materials, and products, helping spaces look their best
- **Increased Perception of Quality:** High CRI lighting elevates the appearance of interiors and products, reinforcing a premium feel

At BELL Lighting, our high CRI LED lamps are designed to combine energy efficiency with exceptional light quality - delivering performance where colour matters most.

### High CRI

### Low CRI

## A guide to terms used in lighting

### Wattage (W)

The unit for measuring electrical power. It defines the rate of energy consumption by an electrical device when it is in operation. The energy costs of operating a device is calculated as its wattage times the hours of use. In single phase circuits, it is related to volts and amps by the formula: Volts x amps x PF = Watts (Note for AC circuits PF must be included).

### Lumens (Lm)

A unit of light flow, or luminous flux. The lumen rating of a lamp is a measurement of the total light output of the lamp.

### Light Output Ratio (LOR)

The ratio of the total light output of a luminaire, compared with total lamp light output.

### Lux (Lx)

A unit of illuminance or light falling onto a surface. One lux is equal to one lumen per square meter. Ten lux approximately equals one footcandle.

### Candela (Cd)

Unit of luminous intensity, describing the intensity of a light source in a specific direction.

### Colour Rendering Index (CRI)

A scale of the effect of a light source on the colour appearance of an object compared to its colour appearance under a referenced light source. Expressed on a scale of 1-100, where 100 indicates no colour shift. A low CRI rating suggests the colours of objects will appear unnatural under that particular light source.

### Lumen Maintenance Ratio (LMR)

The proportion of light output of a lamp after a stated period compared with initial lumen output.

### Colour Temperature

The colour temperature is a specification of the colour appearance of a light source, relating the colour to a reference source heated to a particular temperature, measured by the thermal unit Kelvin. The measurement can also be described as the "warmth" or "coolness" of a light source. Generally, sources below 3200K are considered warm, while those above 4000K are considered cool sources.

The colour temperature of a light source is measured in degrees Kelvin. Above is a Kelvin temperature chart with examples of how colour temperature is used for different applications.

# Update: New energy label 2022

According to the new Energy Labelling Regulation (EU) 2019/2015 (ELR for short), lamps, LED modules and lights where the light source cannot be removed without destroying it will have to bear a new energy efficiency label from September 2021.

This will show a scale from A to G, which will make it easier for you to choose an efficient light source. In addition, the new energy label will be supplemented by a QR code. This provides you with important product information, which should also help you in your choice. The aim of the new regulation is thus to create a particularly consumer-friendly energy label.

## Why get rid of the A++ energy rating?

Back when energy labels were first introduced 20 years ago, the rating system was fairly simple. An A for the most energy efficient appliances and F for the least. But things got a little more complicated as new, more efficient products started coming out. That's how we've ended up with ratings of A+, A++.

As LED lighting improved, more and more ended up in the A+ to A++ category. That made things confusing, since it was harder to tell which actually used less energy. This new change cuts out the confusion. Now appliances are rated from A to G - nice and easy!

## Why have an energy label?

Energy labels are there to help you make an informed choice when you're shopping- and that's true whether you're in the UK or the EU. An appliance with a low energy rating is less energy efficient than one with a high rating. So, if you buy a lamps with a G rather than an A rating, you could end up spending more on your electricity bill. And, of course, it's not as nice to the planet either!

# BELL Lamp Example

See below example of new and old energy label for BELL GU10 Lamp (code: 05766). This 6W lamp has a lumen output of 540, which equals 90 lumens per watt, giving a new energy rating of F. The energy efficiency of the lamp has not changed

### Note on the transition period

Until the end of February 2023, you will find both the old and the new energy label in the shops. The relabeling will take place during these 18 months. From March 2023, the new energy label will be mandatory for all lamps, luminaires and LED modules.

## ELECTRICAL WASTE RECYCLING AND COLLECTION

As customers of Bell Lighting you are able to access our WEEE collection and recycling service.

Our national collection service provides a range of containers collecting the following:

### LAMP RECYCLING

HALOGEN

INCANDESCENT

2D LAMPS

METAL HALIDE

FLUORESCENT

LED LAMPS

### WEEE RECYCLING

GENERAL

SMALL OFFICE

CABLING

KITCHEN

IT OFFICE

LUMINARIES

**BELL CUSTOMERS\*: TO REQUEST A COLLECTION OF OLD PRODUCTS PLEASE CONTACT:**
