

Location: Normanton, West Yorkshire

Working hours: Monday to Friday, 37.5 hours per week

About Us

Founded in 1920, BELL Lighting continues to be a family run business with over 100 years of experience manufacturing and distributing Commercial and domestic Lighting. Recognised as one of the UK leading

Lighting companies BELL continues to innovate from its Head Office, West Yorkshire with a dedicated bespoke design 100 000 sq ft NDC with warehouse storage, large conference facility, LAB, QC test centre and modern office suites.

Our core values Customer experience, Better Together, Vision and passion encompass a family culture where the personal development, training and wellbeing of the team are paramount to develop and progress careers within the business.

We offer a generous health shield scheme, an onsite fully equipped gym with inclusive free group PT training, cycle to work scheme and a host of paid team building external events. Mental health champions and awareness programs also assist with the wellbeing and development of all employees.

About the Role

We are looking for a Lighting Design Engineer to join our team responsible for creating and providing a high standard of lighting designs and specifications to meet our customer's requirements. Your daily duties will include but not be limited to:

- Design and co-ordinate lighting projects from start to finish, using information provided to create a finished presentation for the customer
- Liaise with the client and other internal departments to discuss ideas, concepts and alternative solutions where required
- Involved in the creating and designing of well-constructed plans, ensuring building regulations are met whilst providing a high level of knowledge and service to the customer
- Prepare detailed plans for both internal and external lighting requirements using Relux & Dialux
- Work as a team to discuss and implement ideas on projects
- Brief and liaise with the Lighting Design Manager, Technical Director and other departments to ensure projects meet the building regulations and compliance

Who are we looking for?

We are looking for a motivated individual who is keen to develop with a growing business. Our ideal candidate must have:

- A minimum of 2 years working within a Lighting Design Engineer role
- LIA qualification
- Experience using lighting design software such as Relux, Dialux and AutoCAD
- Demonstrate a good understanding of lighting fundamentals & specifications
- Organisational and numerical skills to manage projects & budgets
- Excellent communication skills, both written and verbally, with close attention to detail
- Advanced LIA certificate is desirable but not essential

Benefits

- Competitive salary & Company pension
- 25 days annual leave + bank holidays per year, with an additional day for each year of service, up to 28 days'
- Free on-site gym, with a free weekly gym class led by a Personal Trainer
- Annual flu vaccinations available
- Health Shield scheme after completion of probation
- Cycle to work scheme after completion of probation
- Salary sacrifice Electric Car Scheme after 12 months service
- Free Fruit
- Free milk
- Annual events, such as Family Fun Day and Christmas Party
- Bi-annual Team building events and allowance with your department
- Employee of the Month scheme

Being part of our Light & Design team, you will continually develop your knowledge through on-site training with our Technical Director. Upon completing 1 year service, you will have the opportunity to attend external LIA academy training courses to advance your knowledge.
